WEEK 8

IN SUMMARY

This week's lesson covered the history, structure, and role of the Nigerian judiciary, as well as the legal framework for citizenship and civic responsibilities in Nigeria. The Nigerian judiciary is often regarded as the third branch of government, alongside the executive and legislative branches. Its historical development includes pre-colonial indigenous judicial systems and the British colonial influence, which led to the establishment of a hierarchical court system.

The legal provisions for citizenship in Nigeria, outlined in the Constitution, include citizenship by birth, registration, and naturalisation. Dual citizenship is permitted, and individuals can renounce their citizenship under certain conditions. Citizenship carries both rights and responsibilities, and civic duties are outlined in the Constitution, including obeying the law, paying taxes, and contributing to the community's well-being.
